These guests can be from Radford University, other universities who have passed legislation on similar topics, or other relevant persons. These discussions can further complement specific research already completed by these Senate Committees.
- b. Additional Senators, Cabinet, and Staff members will be invited to work on the legislation with that Senate Committee as pertaining to the

relevance of their position.

- c. Based upon the information received, the committee will generate a first draft of a legislative resolution for subsequent consideration.

2 - Markup Session/Introduction of Amendments by Senators:

- a. After thorough research, Senators will introduce their initial draft resolution(s) and amendments that they have been working on. These amendments are to be typed and to reflect the appropriate language of their specified subject matter. Preferably, Senators will have, in committee, broken down separate topics of the legislation to focus on so that one Senator does not write the entire bill.
- b. Each amendment will be voted on by the committee to be added to the bill. The amendment will pass into the bill by a simple majority vote of the Senators on that committee.

3 - Introduction of Legislation in General Body:

- a. The Chair of the Senate Committee will present the bill in its entirety at the week's SGA General Body meeting. The bill can be presented orally or via PowerPoint presentation, but the presentation should reflect highlights and key points in the bill, not just a reading of the legislation verbatim. Senators can read the entire bill after it is introduced and before they cast their vote the following General Body meeting.

4 - Senate Vote on Legislation in General Body:
